Othman Daoud

Electrical Power Engineer

About Me

As a recent graduate in electrical engineering seeking full-time employment, I am enthusiastic about continual learning and gaining hands-on experience. I excel in adapting quickly to diverse work environments, possess strong communication skills, and thrive as a collaborative team member. While my expertise includes foundational knowledge in classic control and PLC systems, I am eager to further develop and apply these skills in a professional setting.

Education

Al Balqa Applied University-Faculty of Engineering Technology (2018-2023)

Bachelor's degree, Electrical Power Engineering with a very good grade

Al Zarqa Secondary School (2016-2018)

High school degree in the scientific field with a very good grade

Courses

- Emotional Intelligence Training Course (4 Hours)
- The Basics of Arduino Workshop (5 Hours)
- Classical Control (20 Hours)
- PLC Advance (45 Hours)

Volunteering

- Volunteer at IEEE Jordan PES Conference 2020
- Member Development at IEEE PES/IAS Joint Chapter

Experience

AL-Hanoof Factory for Medical & Lab Supplies (5 months)

I learned and worked on plastic injection molding machines. And It includes:(installing or removing the injection molds from the machines, making sure all the parameters are fit for each product on the machines).
